The new anthracite-coloured floor coating makes a winning impression

The Silikal flooring has been used in the seating areas, corridors and eating areas – in fact pretty much everywhere except the actual bowling alleys.

The attractive anthracite colouring provides a modern backdrop for this fun-filled venue. The reactive resin flooring was used over an area of 450 m² to restore the basalt tiles. And a further 300 m² of existing screed was also covered with a new Silikal coating.

The synthetic resin flooring is extremely resilient and low-maintenance, making it the ideal choice for the busy bowling centre. Large numbers of visitors, bowling balls which fall on the floor, spilt drinks and other soiling are no longer a problem.
